

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	23 October 2023
Team ID	592655
Project Name	Disease Prediction Using Machine Learning
Maximum Marks	10 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Disease Prediction Using Machine Learning

This online program allows you to utilize the model to determine the most likely cause of any symptoms you may be experiencing, even if you don't think you have one.

🕒 10 minutes to prepare

🕒 1 hour to collaborate

👤 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

[Open article](#)

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

Create a disease prediction model in machine learning, addressing data challenges for accurate and reliable healthcare applications.

Key rules of brainstorming

To run a smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

Need some inspiration?

See a finished version of this template to kickstart your work.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Tarun Sreenivas

Ensure that your dataset is clean, consistent, and free from missing values to prevent data-related issues that could affect the model's accuracy.

Establish a system to monitor and update your model over time to adapt to changing

Develop an intuitive and user-friendly interface for healthcare professionals and end-users to interact with the disease prediction system easily.

Anish Narla

Develop an User friendly interface

Consider techniques for handling missing data, outlier detection, and data normalization.

Make sure your dataset is error-free, consistent, and free of missing values to avoid problems with the data that could compromise the accuracy of the model.

Perisetla Sri Sai Yagnik

Gather feedback from users to enhance the model's real-world applicability.

Define a strategy for model updates and retraining based on changing disease patterns and the degradation of model performance over time

Choose and utilize appropriate evaluation metrics that align with the nature of the disease and your project goals.

Attada Karthikeya

Regularly update and retrain the model using the latest data and collaborate with experts to adapt to changing disease patterns.

Invest time in feature selection and engineering to improve the model's predictive accuracy.

Get user feedback so that the model can be more practically improved

Step-2: Brainstorm, Idea Listing and Grouping (Contd.)

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Develop an
User friendly
interface

Establish a

model's real-
world
applicability.

Invest time in
feature selection
and engineering to
improve the
model's predictive
accuracy.

Step-3: Idea Prioritization

4

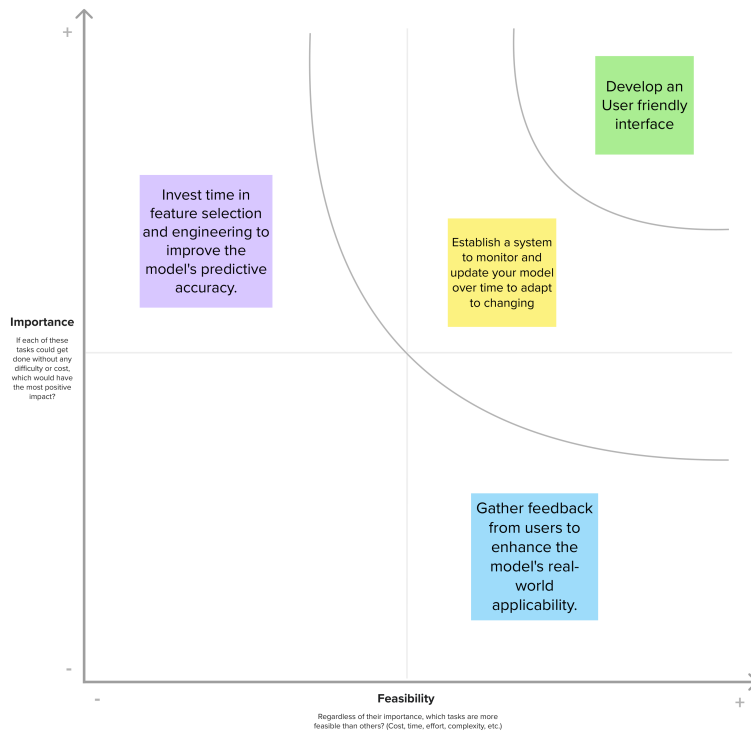

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H** key on the keyboard.

➔

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

- Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

- Strategy blueprint**
Define the components of a new idea or strategy.
[Open the template →](#)
- Customer experience journey map**
Understand customer needs, motivations, and obstacles for an experience.
[Open the template →](#)
- Strengths, weaknesses, opportunities & threats**
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
